### FIELD COMPLIANCE INSPECTION REPORT

Dear Mr. Bown:

On October 1, 2003, an inspection was conducted at the Lynn Springs Quarry, T.14N., R.16W., Sections 20 and 29, Raft River Range, Box Elder County, Utah.

The inspectors noted that the site was extremely clean and well-kept with minimal trash and few petroleum spills found.

The main quarry was mapped using GPS (global positioning system) and was found to have grown approximately 1/3 of an acre since the site was previously mapped by this office on November 5, 2001. Our authorization letter of August 12, 1999 for this plan of operations limited operations to presently open or disturbed areas. If you plan further expansion of operations for this site, you will need to submit to this office an amended plan of operations detailing future proposed disturbance.

The inspectors also noted that the main access road on the Forest Service is in poor shape with deep, dust-filled ruts and little to no drainage controls. The authorization letter for this project provided road maintenance and road construction standards for this operation. These standards should be followed to improve the main access road condition and minimize erosion.

RECEIVED

OCT 20 2003

DIV. OF OIL, GAS & MINING

The inspectors found an apparently abandoned (motor missing) green cab dump truck that does not appear operable on site. If this vehicle is not needed for operations, it should be removed from the site as soon as possible.

If you have any questions or comments, please contact Steve Flock, Minerals Management Specialist, at the above address or telephone number.

Sincerely,

SCOTT C. NANNENGA  
Minidoka District Ranger
